SUMMARY

Frontend Developer with 2 years of production experience building scalable, responsive applications across enterprise, healthcare, and consumer domains. Shipped frontend modules for CRM, HRMS, EMR, POS, and travel booking systems at Dreams Technologies. Contributed a market-ready admin dashboard template to Envato ThemeForest. Specialist in React, TypeScript, and Redux — focused on reusable component architecture, REST API integration, and measurable performance gains through code splitting and lazy loading.

PROFESSIONAL EXPERIENCE

Junior Software Developer, *Dreams Technologies* 2024 – Present · Coimbatore 📍

- Built and maintained **6+ production applications** across CRM, HRMS, EMR, clinic management, POS, and travel booking domains using React, TypeScript, Redux, and Tailwind CSS.
- Developed a shared reusable component library adopted across all active projects, cutting per-project UI setup time and reducing code duplication significantly.
- Integrated **15+ REST APIs** via Axios across authentication, records management, and reporting modules — enabling fully dynamic data rendering with Redux state management.
- Implemented code splitting and lazy loading strategies, reducing initial bundle load time across enterprise apps.
- Built healthcare platform modules — dynamic patient records, appointment workflows, and role-based access — serving clinical workflows across multiple departments.
- Delivered POS system UI with real-time transaction flows, inventory tracking, and billing — including a sales dashboard with daily/weekly/monthly reporting charts.
- Translated Figma designs and client briefs into pixel-perfect, cross-browser compatible interfaces across desktop and mobile breakpoints.
- Collaborated with designers and backend developers in an agile workflow — participating in sprint planning, code reviews, and daily standups to deliver features on schedule.
- Established consistent coding standards and folder structure conventions across frontend projects, improving onboarding speed for new team members.
- Debugged and resolved cross-browser compatibility issues across Chrome, Firefox, and Safari — ensuring consistent UI behaviour across all supported environments.
- Contributed UI templates published on **Envato ThemeForest** — reaching a global developer audience. [View on Envato](#) ↗ 📄

PROJECT EXPERIENCE

Admin Dashboard Template

- **Admin Dashboard Template** [Envato ThemeForest](#) ↗ [🔗](#)
- Published market-ready admin dashboard on Envato ThemeForest — includes data tables, charts, modals, and navigation layouts with dark/light mode and responsive grid.
- Built both admin and frontend website versions in Next.js, leveraging SSR and file-based routing for improved SEO and performance.
- Optimised bundle size using Vite code splitting — fast load out of the box for SaaS, CRM, and ERP use cases.

POS System

- Built full-featured Point of Sale app with real-time billing, inventory management (stock alerts, category tracking), and a sales dashboard with dynamic reporting charts.
- Integrated REST APIs for live product data, transaction records, and inventory sync; ensured seamless experience across desktop and tablet.

HRMS System

- Built leave management module (apply/approve/reject) with role-based access for employees and managers, and attendance tracking with daily logs and real-time status.
- Designed reusable form components and data tables used consistently across all HR modules; integrated payroll, leave balance, and employee records APIs

SKILLS

Programming Languages — JavaScript (ES6+) , TypeScript

Frameworks & Libraries — React , Redux , React Router , React Hooks , Next.js

Frontend Technologies — HTML5 , CSS3 , SCSS , Bootstrap , Tailwind CSS

Tools & Build — Vite , Git , GitLab , Axios

Development & Optimization — Reusable Component Architecture , Lazy Loading , Responsive Design

EDUCATION

Bachelor of Engineering (Computer Science and Engineering), <i>Sri Ramakrishna Engineering College, Coimbatore</i>	2020 – 2024 Coimbatore
